

Call for Workshop and Tutorial Proposals

**International Conference on Privacy, Security and Trust (PST)
August 17-19, 2010**

Workshops and Tutorials: August 17, 2010

The PST2010 International Conference on Privacy, Security and Trust (PST) is being held in Ottawa, Ontario, Canada, August 17-19, 2010. PST2010 is the eighth such annual conference focusing on PST technologies. PST2010 provides a forum for researchers world-wide to unveil their latest work in privacy, security and trust and to show how this research can be used to enable innovation.

Proposals are solicited for workshops or tutorial sessions to be held on August 17th, 2010 on topics related to the major themes of the conference: *privacy, security, trust*. Detailed descriptions of each theme can be found at <http://www.unb.ca/pstnet/pst2010/>

Tutorial/workshops attendance is included in the general conference registration, so proposals should be targeted for a general audience. The preferred format is a half day session for the morning or afternoon.

Workshops are intended to provide a platform for presenting ideas in a less formal and possibly more focused way than the conference itself. They should allow members of the community to interact and discuss approaches, methods, and concepts about specific topics. They should offer a good opportunity for researchers to present their initial work and to obtain feedback from an interested community. Workshop organizers are responsible for establishing a program committee, collecting and evaluating submissions, notifying authors of acceptance or rejection in due time, and ensuring a transparent and fair selection process, organizing selected papers into sessions, and assigning session chairs.

Tutorials should provide participants with information and instruction on well-established or new cutting-edge topics or tools (including technology demonstrations), relevant to the conference themes. Introductory to advanced tutorial sessions are welcome. They are intended to offer participants an opportunity to learn about new research or applications, to get an introduction to important established topics or tools, or to develop higher skill levels in areas in which they are already knowledgeable.

Any person interested in developing a workshop or tutorial is invited to submit their proposals to the workshop/tutorial chair.

Proposals to organise workshops should include the following information:

- Title of the workshop.
- Name, affiliation, and contact information of the primary organizers.
- Names of the PC members with their affiliations.
- Proposed duration.
- A theme and a short description of the workshop goals.
- A brief introduction of the proposer, explaining his/her qualifications.

Proposals to organise tutorials should include the following information:

- Title of the tutorial
- Indication of the proposed length of the tutorial
- A short description of the tutorial.
- Identification of the tutorial level: introductory, intermediate or advanced.
- Detailed outline for the tutorial.
- Intended audience.
- A brief description of the instructor of the tutorial, including contact information (mailing address, email, fax) and the relevant qualifications and teaching experience.

Important Dates for Workshops/Tutorials

April 3, 2010: Workshop/Tutorial proposal submission due.

April 20, 2010: Feedback provided to the workshop/tutorial proposals.

June 26, 2010: Final manuscript, author and tutorial attendee pre-registration due.

August 17, 2010: Workshops and Tutorials
